► INFRATECH CURING SYSTEMS JOINS THE COLLISION PRO CATALOG

Infratech has over 50 years of experience in industrial finishing and curing. They provide infrared heating components for a wide variety of industrial needs, including furniture, automotive refinishing, powder coating, dry-off ovens, laminating lines, screen-printing, composites, and plastic forming.

Discover a cost-effective way to accelerate production in the drying or curing of virtually any air-dry coating, adhesive or two-component material with Infratech heating fixtures. Our portable lamps, heat panels, oven components and UL Listed 508 controls offer added flexibility, value and rapid payback even when used in the most demanding production applications.

See Front Cover & Back Page for additional details.

INFRATECH

► GERSON INTRODUCES PARTICLE CONTROL SYSTEM KITS

Two new kits are now available for complete particle removal and contamination control for a perfect waterborne finishes.

- Performance-matched strainer/tack-cloth system developed specially for waterborne finishes
- Spectrographically-pure, USA made synthetic-mesh 125 micron paint strainer for superior filtering of waterborne paints
- Next Generation synthetic tack cloths for complete surface particle removal

Kit #019921B Waterborne Kit includes 75 each 125-micron synthetic paint strainers and 10 each Ultra™ prep tack cloths.

Kit #019601Y All Finishes Kit includes 75 each 190-micron synthetic paint strainers and 10 each Ultra™ prep tack cloths.

See Page 4 for additional details.

► STECK INTRODUCES HATCH JAMMER XL

Steck Manufacturing Company has released another winning tool: The **Hatch Jammer XL** (PN 17200) allows body shop technicians to hold lift gate or hatch in a partially open position for sanding, painting, buffing like they do today with the original Hatch Jammer or totally open to easily replace lift struts or work inside the hatch or cargo area without having the hatch fall.

Hatch Jammer XL easily adjusts the work angle of the hatch door from 15" to 21" to 34" and to full extension of 59". This allows the technician to secure the hatch position to repair and paint the hatch as well as securing the hatch to replace lift struts and access interior cargo area work. Hatch doors are easily positioned by attaching the metal J-hook end to the striker and latching the larger loop end of the extender bar to the latch. It has adjustable slide bars which gives up to 59" to adjust the angle and is secured with two locking pins and tightened with three adjustment knobs. The Hatch Jammer XL will stabilize the hatch for easier prep and painting of the hatch as well as holding the hatch fully open to replace struts and allow access for work inside the cargo area.

See Page 8 for additional details.

► S.M. ARNOLD INTRODUCES RUBBLE WRAP

This is a self adhesive plastic film is used to seal broken windows, un-closable doors of vehicles exposed to weather. The wrap is coated with a light-tack adhesive designed to grip the surface then be removed without leaving adhesive residue. The film features ultraviolet inhibitors to prevent damage when exposed to sunlight for lengthy periods of time. 36" x 100' x 3Mil
